Understanding the U.S. Middle Market

The U.S. middle market is defined by companies with annual revenues between \$10 million and \$1 billion. It is incredibly diverse, reaching across all industry segments and encompassing publicly and privately held companies, family-owned businesses, partnerships, and sole proprietorships. While the middle market represents just 3% of all U.S. companies, it accounts for a third of U.S. private sector gross domestic product (GDP) and jobs.

Yet the middle market is not just important from a national perspective. At both the state and local level, in every corner of the country, it is middle market companies that are creating new jobs and driving growth and economic recovery in their regions and communities.
